

Have you or a colleague ever had an idea to improve an area of healthcare but not known what to do with it?

Are you interested in finding out about new ideas and opportunities developed by NHS colleagues?

Do you have an interest in promoting new ideas and developing an innovation culture within your NHS Organisation?

Yorkshire & Humber Innovation Champion Network

Your organisation is looking for volunteers to join the successful Innovation Champion Network.

Every day NHS staff in a range of roles and disciplines are devising innovative new ideas for medical technologies, training aids, software and service delivery to solve problems and make improvements. To support this important work, Medipex and the Yorkshire and Humber Academic Health Science Network (Yorkshire & Humber AHSN) have established a network of Innovation Champions throughout the region which aims to:

- Empower individuals to promote and support innovative activities within their NHS organisations;
- Encourage colleagues to come forward with their new and innovative ideas and inventions; and,
- Promote the spread and adoption of new best practice and new technologies between NHS organisations.

Any NHS employee with an interest in innovation can become an Innovation Champion!

Help our NHS to **uncover and develop ideas with potential!** All Champions will receive **training** and **full support from Medipex and Yorkshire & Humber AHSN** to carry out their new role. You will become a member of an established peer network of regional Innovation Champions with access to special networking events and further training opportunities. We ask that you ensure can commit a minimum of 6 days per year (half a day per month) to this role before applying.
